MOTION Infinity DynaMESH + Bluetooth Group Intercom for unlimited amount of Riders up to 1200m range - per Person

The MOTION Infinity is the first headset on the market to offer Bluetooth 5.0 and DynaMESH Intercom. In addition, there are many functions integrated into a headset for the first time, such as the **U-SAFE** crash sensor. This alerts up to 3 contacts via SMS with GPS location information and displays on a map in the event of strong helmet impacts such as an accident.

The MOTION models are also the first headsets to offer contactless gesture control. With simple hand movements within a sensor beam next to the headset the music can be controlled from a smartphone. Voice commands are also understood and can be adapted to your own pronunciation. Siri and Google Voice are also supported. The headsets switch on automatically when you move and switch off again automatically after a few minutes without activity, thus saving energy for a longer battery life.

The intercom/intercom system groups can be started at the touch of a button. A coupling is possible with all Bluetooth devices as well as via Universal Intercom, even with all Bluetooth headsets from other manufacturers.

MOTION 6 DynaMESH + Bluetooth Headset Group Intercom for up to 6 Rider up to 1200m Range - per Person

The MOTION 6 is in the same design and offers similar features as the MOTION Infinity. Only the maximum number of connected riders in the group is limited to 6 and the U-SAFE crash sensor is missing. Otherwise, the following features are identical:

Music from the smartphone can be shared with other riders and even heard in the background of a conversation. No more annoying microphone in front of the mouth: Two invisibly installed Dual MEMS microphones with patented noise suppression ensure the best communication even in noisy environments.

The CLEARLink Smartphone App allows easy configuration of headsets, displays battery status and includes a manual and interactive instructions. Firmware updates can be done wirelessly via the app.

The MOTION headsets come with three brackets and are therefore suitable for all motorcycle helmets: Integral, off-road, flip-up, jet helmets, but also ski, riding, bicycle and construction helmets.

For ski helmets, bicycle helmets, riding helmets and construction helmets without loudspeaker attachment, an optional earphone/microphone set #111043** and other holders are available.

AMP GO MULTI-HOP Bluetooth Headset Group Intercom for up to 4 Rider up to 300m Range - per Person

The AMP GO is a simple Bluetooth 4.2 headset based on the proven UCLEAR HBC and AMP series. In addition to the intercom function for up to 4 riders, all other functions such as telephoning or listening to music and navigation announcements are also supported. The AMP GO can also connect to all Bluetooth devices such as smartphones, GPS and headsets from any manufacturer. The AMP Go has the two microphones built directly into the speakers so that no annoying microphone get in the way when putting on the helmet and is in front of the mouth. It also has some comfort features of the MOTION series such as music overlay for entertainment, can connect phone calls to Intercom and also supports Siri and Google Voice. Using the CLEAR-Link app, all functions can be easily configured and firmware updates can be wirelessly uploaded.

The AMP GO headset comes with two brackets and is suitable for all motorcycle helmets: Integral, off-road, flip-up and jet helmets, but also ski, riding, bicycle and construction helmets.

For ski helmets, bicycle helmets, riding helmets and construction helmets without loudspeaker attachment, an optional earphone / microphone set #11017*** and other holders are available.

Wired Helmet Drop - In Speakers or Headset

PULSE Drop-In Helmet Speakers #11023
PULSE Plus Drop-In Headset #11031 includes microphone

The UCLEAR PULSE helmet loudspeakers offer premium stereo sound. The gold-plated 3.5mm standard plug fits almost all smartphones, MP3 players and other devices with a 3.5mm jack. The high-quality helmet loudspeakers are also often used as an upgrade for Bluetooth headsets from other manufacturers. The 1m long cable with additional plug connection allows a quick helmet connection or separation.

Also available as PULSE Plus with a microphone in the cable and high-end cable headset so therefore also suitable for telephoning.

Optional Earbuds with Microphone: Makes UCLEAR Headsets fit for Half-shells/Ski/Bicycle/Ride/Building helmets

*** for HBC & AMP Series: #11017
 ** for MOTION Series: #111043

- Including 4 alternate silicone earbud tip options suitable for every ear
- Up to 30dB noise protection!
